

Bamboo Workshop Conducted In Dept. Of Architecture, MIT, Aurangabad (28th Feb. 1st March, 2019)

A workshop was conducted on topic .Bamboo Architecture in the Department of Architecture, MIT, Aurangabad on 28thFeb and 1st Mar 2019 for first, second and third year students of Architecture. The aim of the exercise was to make the students aware of different types of enclosures made up of bamboo which can be used in practice as building material. This two days' workshop was conducted by of Ar. Rajpal Singh from Nagpur. On first day of workshop students got to know about the basics of Bamboo as a building material and its importance in Architecture. The next day students worked on the actual handling of bamboo and used it to create architectural models & sculptures. The lecture was an exposure programme arranged in which the students understood the use of bamboo as a sustainable building material and detailing of it while casting the actual object as per designs.
