

We live in a multilingual and multicultural world, which is being shrunk to the size of a village by the advancement of science and technology. Technology allows engagement, review, and especially assessment in broader, deeper ways. By keeping the same perspective, Basic Science and Humanities department has set Language Laboratory to make language learning more interactive and joyful for the students with the help of technology. The basic purpose of the lab is to provide students a platform to enhance English language skills, communication skills and to practice soft skills. Since the language laboratory gives every learner of any language freedom to learn at their own pace language learning becomes interesting for the students.

DLM Language Software by Thaliyola Infotech, Kochi which is installed in this lab gives learners access to resources for independent or supplemental learning and study. This unique learning-on-demand feature creates additional learning opportunities and reinforces classroom activity. Language Laboratory does not only develop LSRW Skills of English language but it also provides knowledge regarding Aptitude test preparation, professional Communication Skills, business English, competitive exams like GRE, IELTS & TOEFL which gives a Competitive edge to the student of our institute. This well equipped language lab is giving the students the opportunity to become not only an effective communicator but also a good job employee.
