MEMORANDUM OF UNDERSTANDING

between

Tallinn University of Technology (Estonia)

and

Marathwada Institute of Technology (India)

In accordance with a mutual desire to promote collaboration between Tallinn University of Technology (TTÜ) and Marathwada Institute of Technology, Aurangabad, Maharashtra (MIT), both institutions enter into this Memorandum of Understanding on research, education and cultural cooperation.

Tallinn University of Technology, represented by Vice-Rector for Academic Affairs **Hendrik Voll**, and Marathwada Institute of Technology, represented by Principal **Prof. N.G Patil** (hereinafter referred to as the "Parties", agree with the following:

The Parties agree to collaborate in the following relevant areas:

1. Development of joint state-of-art virtual lab on CPS (Cyber Physical Systems), IoT (Internet Of Things), Robotics and autonomous systems that would provide platform for preparation of joint projects with WINC research group at MIT Aurangabad.
2. TTU will support development of an innovation lab at MIT with adequate resources for basic innovation facilities. Details of this will be separately worked out.
3. TTU will support joint development of Center of Excellence in ICT Research at MIT. Details of this will be separately worked out.
4. Both parties to provide internship opportunities to undergraduate and masters students at TTU and MIT, based on mutually agreed upon selection criteria merit of projects proposed and requirement of the research jointly undertaken.
5. Exchange of staff and technologies for the purpose of working in areas of common interest; Cooperate to apply research programs of International organizations or International cooperation projects of the two governments of mutual interests.
6. Jointly organize bilateral or multilateral conferences, symposia, seminars and other scientific meetings on information and communication technologies and on research topics of mutual interest.
7. Exchange of materials and information relating to those scientific areas in which the Parties have mutual interests.
8. Exchange of University lecturers, scientists, postgraduates and students for

studying and doing research.

9. Cooperation within European Union programs.

10. Other ways that can help for cooperation.

Cooperation in specific areas and details will be implemented upon mutual agreement and will be outlined in a separate agreement on cooperation or addendum to this Memorandum upon its signature by the authorized representatives.

There is no financial obligation under this agreement.

Cooperation in specific areas will be implemented upon mutual agreement and will be outlined in a separate agreement on cooperation or addendum to this Memorandum upon its signature by the authorized representatives.

Both Parties agree to seek possibilities for funding from both public and private sources in support of their joint interests.

The Memorandum of Understanding will come into effect after being signed by the authorized representatives of both Parties and is valid for the period of 5 (five) years.

The Memorandum of Understanding is concluded in two equally valid copies in English.

20. Best Practices adopted, if any

Title of the practice:

Student development through participation in co-curricular activities and value added courses.

Objectives of the practice:

- The initiative aims to involve the engineering students in various co-curricular activities like industry specific training modules, technical competitions and activities and providing them with real-world, hands-on exposure to technology.
- To improve the employability of engineers and reduce the time and resources spent by companies on re-training the graduate engineers.

The Context:

According to the United Nations Development Program's (UNDP) India Skills Report 2018, 1.5 million engineers graduate every year, but only 52% are employable. The report also highlights the fact that engineering courses which are linked with industry or corporate through internship or training usually score high on employability as compared to others. Also, student can learn the technology through the co-curricular activities which are closely related to technical specific domain.

The Practice -A: Ready Engineer

Ready Engineer Program is Tata Technologies CSR initiatives to make engineering graduates industry-ready. Students from 2nd and 3rd year mechanical engineering discipline are identified for the training under this program. The program imparts application-based training by industry experts in technical domain training, soft skill training, employability assessment and National Programme on Technology Enhanced Learning (NPTEL) courses to meet the future opportunities of Industry 4.0.

NPTEL, KRACKIN and Aspiring Minds have been selected as the implementation partners for this program. NPTEL provides e-learning through digital and video courses in engineering, the sciences, technology, management and humanities. It is a joint initiative by seven Indian Institutes of Technology (IITs) and the Indian Institute of Science (IISc) Bangalore. KRACKIN, a startup based out of the NASSCOM 10000 Startup warehouse in Bengaluru, is a platform to help improve the industry-readiness of engineering students with timely industry interventions through their web and mobile platforms. Aspiring Minds, a talent assessment organization, helps to enhance soft skill and personality development through credible assessments and training.

The Practice -B: SAEINDIA BAJA / SUPRA

It is an intercollegiate design competition for undergraduate and graduate engineering students run by the Society of Automotive Engineers (SAE). A team of 25 students from different branches of engineering are participating for this event. Every year near about 350-400 teams from different engineering colleges of India are participating in this event.

A team of students have to create the virtual design of an all-terrain car at college level and have present it in front of BAJA committee judges (from different automobile companies). After selection of design through the judging panel students have to fabricate the complete car in the college workshop. They have to test it as per different road conditions and does the iteration in the designs for sustain the car for rough conditions.

After that different team from all over the India have to bring their vehicles at event place and also the different types of technical inspection , static and dynamic testing will get done. After passing the entire test at event place finally the teams will appear for final racing.

The Practice -C: ROBOCON 2018

The Asia - Pacific Robotics contest was found in 2002 by Asia-Pacific Broadcast union. The Asia broadcasting unit Asia - Pacific robotic contest (it is primarily known as ROBOCON) was started in year 2002, with the primary aim of promoting robotics and encouraging students around the world to develop and innovate. Every year, there is a different host nation and they decide the theme according to their own tradition or historical background. There are about 25

chance to represent the country abroad. Every year the nationals are held at Pune, which are organised by Doordarshan in collaboration with an Engineering College. The robotic contest is a scintillating intellectual exercise which has enormous meaning for budding engineers and enthusiastic TV watchers across the world, more so in the countries under the ABU umbrella. Student core team forms the team, design and manufactures the robot as per the given specifications

Evidence of success:

- Through the Ready Engineer program, students are undergoing the basis training module.
- Students successfully designed, tested the an all-terrain car and a robot at college level and participated at the competition at national level
